GREEN CONFERENCE OPTION

We heard your feedback! Following last year's annual conference, we received several comments about the abundance of single-use plastics. This year, we are making an effort to be more environmentally conscious and will be reducing the number of single-use plastics available at the annual conference. We will also be offering a green package option when registering for the conference that will include reusable utensils, a KansABA cup, and more! These items can be used during the annual conference, and future KansABA events, in an effort to reduce our impact on the environment. We hope you will joining us in going green for the 2020 annual conference!
